Projects

E-Commerce Web Application

- **Description:** Developed a full-stack **e-commerce web application** that allows users to create an account, log in, browse products, add items to their cart, and check the total bill. The system also includes basic user authentication and a simple checkout process.
- **Technologies Used:** Java, Spring Boot (backend), React.js (frontend), MySQL (database), Git
- **Key Features:**
 - User Authentication:** Sign up, log in, and log out functionality.
 - Shopping Cart:** Users can add items to the cart, update quantities, and view the total bill.
 - Product Catalog:** Displays products with details such as price and description.
 - Checkout:** Basic checkout process to calculate total cost.
